Day 1

Friday 3rd October

Today we left the UK for our flight to Rio de Janeiro, in southern Brazil.

Day 2

Saturday 4th October

On the way up from the airport, the area around the Bay of Guanabara produced a good array of birds, including Cocoli Heron, Great Egret, Western Cattle Egret, Snowy Egret, hordes of Magnificent Frigatebirds drifting high above the bridge, and Neotropic Cormorant. Upon arrival at the lodge, everyone quickly settled into their rooms and, minutes later, we assembled on the main veranda at the back of the lodge, ready to see our first Atlantic forest endemics. There was a fair bit of action at the feeders, and it wasn't long before everyone had great looks at Brazilian Tanager, Green-headed Tanager, Chestnut-bellied Euphonia and Violaceous Euphonia. We also had views of two Mantled Hawks drifting above the lodge...this was a great bird to see on the first day!

Other highlights from today included Black and White Hawk-Eagle (seen at its usual nest site visible from the veranda), Slaty-breasted Wood-Rail, Maroon-bellied Parakeet, Plain Parakeet, Scaly-headed Parrot, Saw-billed Hermit, Sombre Hummingbird, Black Jacobin, Violet-capped Woodnymph, Brazilian Ruby and great views of three Channel-billed Toucans.

After a good lunch, we headed up onto the Extension Trail, where we spent the rest of the afternoon. During the afternoon, we saw Pale-browed Treehunter, White-eyed Foliage Gleaner, Plain-winged Woodcreeper, White-throated Woodcreeper, Scaled Antbird, Black-cheeked Gnateater, Grey-capped Tyrannulet, Grey-hooded Attila, Pin-tailed Manakin, Blue Manakin, Long-billed Wren, Red-necked Tanager, Brassy-breasted Tanager and Rufous-headed Tanager.

Day 3

Sunday 5th October

This morning, we took a 40 minute drive to the Regua (Reserva Ecologica de Guapi Assu) Wetlands, where we would spend the rest of the morning birding. Highlights were many, and included White-faced and Black-bellied Whistling ducks, Masked Duck (this was a lucky sighting, as they have been absent from the area for quite some time!), Pied-billed Grebe, Rufescent Tiger-Heron, great views of a couple of beautiful Capped Herons, Whistling Heron, Anhinga, Lesser Yellow-headed Vulture, Guira Cuckoo, Greater Ani, Reddish Hermit, Common Potoo, Rufous-tailed Jacamar, Yellow-eared Woodpecker, Sooretama Slaty Antshrike, Silvery-flanked Antwren,

Unicolored Antwren, Greenish Elaenia (a lifer for me....a rare occasion nowadays!), White-bearded Manakin and Chestnut-vented Conebill.

We returned to the lodge for lunch, and then headed out onto the trails behind the lodge for the rest of the afternoon. Highlights included Spot-breasted Antwren, Star-throated Antwren, great views of Rufous-capped Antthrush, Blue Manakin, Blue-naped Chlorophonia and Red-crowned Ant-Tanager.

Day 4

Monday 6th October

After an early breakfast, we took an hour's drive for the start of our open country birding day, within the area of Duas Barras and Sumidouro, with our last planned stop of the day being the Three-toed Jacamar site.

This is always a big count day, and we did very well, seeing some fabulous birds including Dusky-legged Guan, White-tailed Hawk, American Kestrel, Blue-winged Macaw, White-eyed Parakeet, Blue-winged Parrotlet, Burrowing Owl, Planalto Hermit, Glittering-bellied Emerald, Sapphire-spangled Emerald, White-eared Puffbird, Toco Toucan, White Woodpecker, Green-barred Woodpecker, Band-tailed Hornero, Firewood Gatherer, Chestnut-backed Antshrike, Rufous-capped Antshrike, Serra Antwren, Hangnest Tody-Tyrant, Yellow-browed Tyrant, White-rumped Monjita, Streamer-tailed Tyrant, Long-tailed Tyrant, Curl-crested Jay, White-rumped Swallow, Tawny-headed Swallow, Chestnut-capped Blackbird, Magpie Tanager, Gilt-edged Tanager, Swallow Tanager and Ultramarine Grosbeak. A highlight was seeing three of our target species, the endemic Three-toed Jacamar.

Day 5

Tuesday 7th October

We had high expectations today, as we set off towards the start of the Pico da Caladonia and our high altitude excursion. After approximately 50 minutes, we arrived at our parking spot. We were to spend the rest of the day walking up the Pico da Caladonia, climbing up another 700m in altitude. This is always a great day's birding, although a little tough, as the walking is quite steep.

Today was to be a great day: we saw so many good birds and hit all of our target species! Highlights included Yellow-browed Woodpecker, Itatiaia Thistletail, Orange-eyed Thornbird, Rufous-tailed Antbird, Rufous Gnateater, Mouse-colored Tapaculo, Serra do Mar Tyrannulet, Velvety Black-Tyrant and Shear-tailed Grey-Tyrant. The Cotingas included Black and Gold Cotinga, Grey-winged Cotinga and Swallow-tailed Cotinga, as well as Diademed Tanager, Uniform Finch and Bay-chested Warbling-Finch. A tiring but very rewarding day!

Day 6

Wednesday 8th October

As the boardwalk in the Serra dos Órgãos National Park was closed again, we decided to spend a full day on the road to Macaé de Cima. This dirt track runs through some great areas of intact forest, and some very nice stands of native bamboo....excellent habitat for Antbirds!

Many good species were seen today including Rufous-thighed Hawk, Short-tailed Hawk, Zone-tailed Hawk, Black Hawk-Eagle, Scale-throated Hermit, perched male Plovercrests (which gave great views), Surucua Trogon, Spot-billed Toucanet (on demand for Frank!), Green-barred Woodpecker, Grey-bellied Spinetail, Buff-browed

Foliage Gleaner, Rufous-breasted Leaf-tosser (responding to playback like never before!), Sharp-tailed Streamcreeper, Sharp-billed Treehunter, Black-billed Scythebill, Bertonis Antbird, Dusky-tailed Antbird, White-bibbed Antbird, the elusive Spotted Bamboowren, Drab-breasted Bamboo-Tyrant, Eared Pygmy Tyrant, no less than eight Bare-throated Bellbirds, Serra do Mar Tyrant-Manakin, Greenish Schiffornis, White-rimmed Warbler, Half-collared Sparrow and Green-winged Saltator.

Day 7

Thursday 9th October

Today we took the short drive up to 1080m, to the start of the Theodoro Trail. This easy-to-walk trail runs along an old railway track and offers some great forest birding. We returned to the lodge for lunch, and had a free afternoon around the lodge. Some of the group went onto the trails at the back of the lodge.

Highlights from today included Scale-throated Hermit, great views of a pair of Frilled Coquettes within the lodge gardens, Rufous-capped Spinetail, White-collared Foliage Gleaner, Ferruginous Antbird, Rufous-capped Antthrush, great views of three Sharpbills and, if that wasn't enough, immediately afterwards we had fantastic views of Shrike-like Cotinga!

Day 8

Friday 10th October

Today was operation Seriemas! Having visited the High Altitude area once, and scanned endlessly over all of the open fields on the Three-toed Jacamar excursion...we still hadn't seen the Red-legged Seriema! As this was high on many people's wish lists, we decided to head back to do the first section of the High Altitude Excursion lower section at Sao Bernardo. There was also a number of other new birds possible on this trail. We arrived 50 minutes after leaving the lodge, parked the minibus and headed off on the trail. Within 30 minutes, I had a bad view of a Seriema walking off around a corner...never to be seen again! After birding the trail for the morning, we returned to the minibus and Miles decided to hang around and get a few photos.... thank goodness he did! I was just about to close the minibus door, and I glanced over into the distant field... and there it was, a Red-legged Seriema running towards us...what great luck! I shouted to the group who were already seated and ready to leave...they of course thought I was joking! Anyway, after convincing them to get out, we all had fantastic views of this whacky bird!

After this, we headed down to the start of the Theodoro Trail, and then onto the start of the Cedae Trail before heading back to the lodge. Other highlights from today included Amethyst Woodstar, Spot-billed Toucanet, Yellow-eared Woodpecker, Black-capped Foliage Gleaner, Planalto Woodcreeper, Lesser Woodcreeper, Scaled Woodcreeper, Giant Antshrike, Large-tailed Antshrike, White-shouldered Fire-eye, Oustalet's Tyrannulet, Shear-tailed Grey-Tyrant, Black and Gold Cotinga, Swallow-tailed Cotinga, White-necked Thrush, Cinnamon Tanager, Hepatic Tanager and Black-throated Grosbeak.

Day 9 -10

Saturday 11th – Sunday 12th October

The first part of the morning was spent birding the lodge grounds before our departure back to Rio de Janeiro. Highlights from today included: Swallow-tailed Hummingbird, Frilled Coquette, Rufous-capped Motmot, Channel-billed Toucan, Blond-crested Woodpecker, White-throated Spadebill and Black-throated Grosbeak.

We had enjoyed an amazing week, encountering many of the rare endemics of this part of Brazil, and having had so many memorable sightings. Terry very kindly offered to “manage” the top 10 favourite bird species for the group, after a great speech and perfect delivery by Terry, the top 10 were announced as follows:
